Sharemilkers 2018/19 Season & Mycoplasma Bovis New Zealand

Hi Everyone,

Firstly our sharemilkers Jason and Sandy Herrick have signed for another year after having another great season despite the really dry patch of weather mid January February. We are set to do about 400,000 kg of milk solids this season, slightly less than the 407,000 kg milk solids last season. Budgets are being worked on for next season and we look set to aim for the similar production.

Mycoplasma Bovis is on our minds, as this is in the news constantly and we just want to assure you that Murray Creek is clear, there are farms in the surrounding district that are not so lucky. Our farm has taken the appropriate actions and implemented procedures to mitigate the risk.

This map just gives an indication of what the country is facing in regard to the dairy industry.

Kind regards,

Dot McDermott
